

What size inverter is suitable for home use

Overview

For basic lighting, fans, and a TV, a 1000–1500W inverter is usually sufficient. If running an AC or fridge, consider 2000W or more. Q3: Is a higher VA rating better?

A: Not always. A higher VA inverter can handle more load, but if your battery can't support it, you'll get. The inverter size depends on the number of appliances or gadgets you want to run with it during outages or outdoor activities. The need for an inverter size chart first became apparent when researching our DIY solar generator build.
