## Overview

---

Just four years after switching on Norway's first 5G base stations in the town of Lillestrøm, Telia's 5G network now covers close to 99% of the population. Telia and TXO have partnered to upgrade Norway's network sustainably, recycling 12,805 used equipment parts in the process. Telia, the Nordic telecommunications provider, has completed a nationwide 5G network modernisation in Norway whilst recycling 70 tonnes of legacy network equipment through a. The LTE Base Station System serves as the cornerstone of Long-Term Evolution (LTE) mobile communication networks, functioning as the primary interface between mobile users and the operator's core network. It enables wireless transmission of data, voice, and multimedia services by managing the radio. Amid the challenging terrains of Trollstigen, 850m high in Norway's Romsdalen Valley, Eltek takes telecoms to new heights. To bridge the connectivity gap in a breathtaking but remote touristic hotspot, while respecting its environmental sanctity. Telus Telus Corporation is a Canadian publicly-traded holding company and is the parent company of several subsidiary companies, including Telus. In 5G NR (New Radio) technology, the base station is referred to as gNodeB or gNb. Leading manufacturers provide advanced solutions for telecom operators and enterprises.
