

# Which battery should be used with a small outdoor solar power hub

## Overview

---

The most common battery types used in off-grid setups are lead-acid batteries, which come in two main varieties: flooded and sealed (AGM and gel). But how do you know which battery size best meets your energy needs?

This guide walks through essential terminology, step-by-step sizing. The right battery can make all the difference, ensuring you have power when you need it most. In this article, you'll discover the best battery options for solar systems, including their pros and cons. It also needs to stay stable and safe while delivering power for years. However, they require. In general the system should be big enough to supply all your energy needs for a few cloudy days but still small enough to be charged by your solar panels.
