A solar generator is a portable power system that captures energy from the sun using solar panels, stores it in a built-in battery, and converts it into usable electricity through an inverter. Cost-effectiveness remains a core consideration, 4. These powerful power packs offer huge battery capacity that can fuel large devices and even appliances in a pinch. They're great in an emergency, but they're also essential tailgating and camping equipment. As solar technology improves and our understanding of the climate crisis deepens – especially in the face of steep price hikes to gas and oil – more and more of us are turning to alternative renewable energy sources to meet our needs.
