

White square on photovoltaic panel

Overview

The gap lines are spaces between the solar cells, through which you can see the panel's white backing. Both the fingers and the busbars are electrical conductors. If you've noticed mysterious white spots on your photovoltaic (PV) panels, you're not alone. Over 23% of solar system owners report similar discolorations within the first 5 years of installation according to the 2023 Gartner Emerging Tech Report.

What's wrong with the white spots on the photovoltaic panel surface

The current generated in a solar panel flows smoothly through the bond between the individual panel cells. But some panels may remain partially

shaded which causes them to generate less power.
