

Will the price of energy storage batteries continue to drop

Overview

According to BloombergNEF's annual survey, battery prices in 2025 remained at \$108 per kilowatt-hour, an eight percent decrease. Experts also anticipate further price declines next year, although at a slower rate than in 2025 due to high raw material costs and tariffs. The decrease was due to improvements in. Miller, who is an expert in all aspects of traction batteries for electric vehicles, writes that the automotive industry is currently paying about €54 per kilowatt-hour for LFP battery cells and €58 per kilowatt-hour for NMC battery cells.

Will the price of energy storage batteries continue to drop

Electric vehicle battery prices are expected to fall almost 50% by 2026

Technology advances that have allowed electric vehicle battery makers to increase energy density, combined with a drop in green metal prices, will push battery prices lower than previously ...
