

# Will the price of scrap metal increase as the price of photovoltaic panels rise

## Overview

---

Experts predict moderate but steady increases in silicon, aluminum, and copper prices through 2025. Check 2025 solar pricing forecasts for more detailed projections. Copper, lithium battery materials, and aluminum will command significantly higher prices in 2026 because electric vehicle production is scaling past critical volumes while mining operations can't expand supply fast enough. Infrastructure spending hits peak material demand just as battery recycling. From April 2026, China will scrap VAT rebates on solar exports. The impact is already being felt across the market, with experts forecasting a 10-15% increase in panel prices, tightening supply chains and triggering pre-buying worldwide. This volatility in prices makes life difficult for photovoltaic manufacturers, who. Steel prices continue to show signs of optimism, with industry forecasts suggesting potential increases of \$20-\$30 per metric ton in the coming months. By the end, you'll. Solar module prices are on the rise, a trend that won't stop any time soon.

## Will the price of scrap metal increase as the price of photovoltaic panels rises?

---

### The era of ultra-cheap solar panels is ending as prices set to rise up

The impact is already being felt across the market, with experts forecasting a 10-15% increase in panel prices, tightening supply chains and triggering pre-buying worldwide.
