

Xiaochun Network Solar Power Generation

Xiaochun Network Solar Power Generation

Xiaochun Xu's research works , State Grid Electric Power Research

A reactive power reserve prediction method for ev charging piles based on big data and optimized neural network is proposed.

Ultra-short-term photovoltaic power

prediction based on modal

This study proposes a PV power prediction model based on modal reconstruction and bidirectional long and short-term memory network stacked convolutional neural network with ...

Lithium battery parameters

Product capacity: 100Ah

Product size: 135*197*35mm

Product weight: 1.82kg

Product voltage: 3.2V

internal resistance: within 0.5

Ultra-short-term photovoltaic power prediction based on similar day

In light of this, this paper introduces a PV power prediction model based on similar-

day clustering and temporal convolutional network (TCN) with bidirectional long short-term memory ...

Maximizing solar power generation through conventional and

In the context of solar power extraction, this research paper performs a thorough comparative examination of ten controllers, including both conventional maximum power point ...

[Get Price](#)

Greenness change associated with construction and operation of

Photovoltaic (PV) solar energy is considered as a promising solution to mitigate the environmental costs

associated with the use of fossil fuels.
However, the environmental impacts of

...
