

Zimbabwe increased renewable energy penetration

Overview

Increase renewable energy share from 7.8% to 29% by 2030, tripling capacity through utility-scale solar, mini-hydro, and bioenergy investments. Transition into an upper-middle-income economy by 2030. This vision is guided by five key pillars, supported by factors such as strong governance, economic stability, infrastructure development, quality of life delivery to support national development goals. Vision 2030 aligns with regional and global clean energy for all Zimbabweans by 2030, while advancing inclusive growth and climate resilience. Energy security, reduced reliance on fossil fuels, and promotion of sustainable industrial growth could be achieved by tapping into the. Zimbabwe has to unlock and leverage on its vast renewable energy potential to leapfrog from the current energy poverty to becoming a self-sustainable regional electricity exporter. Key projects include solar, hydro, and wind initiatives, boosting agricultural productivity and job creation.
